CONFIDENTAL

Price List

Dental costs vary significantly from practice to practice and in different areas across the UK. Here are a few points that may help clarify our pricing structure at Confidental:-

- Estimated cost: If a treatment is showing as a "From £" this is because every patient is different and every case is unique. We will give you a more precise quote after the consultation stage, when our clinicians have had the opportunity to discuss your requirements and assess your oral health.
- Experienced Care: Our Dental treatments are carried out by highly skilled clinicians with a wealth of knowledge and experience.
- Quality materials: We firmly believe that to achieve optimum clinical results, our clinicians must use the most precise equipment and the best materials for our patients. If you see cheap dental prices, the materials used will not be of premium standard.
- In all cases we provide a full written treatment plan showing costs at each stage.
